CUBE**GUARD** Anatomy 101

Post Mount

Post →

Retractable Message
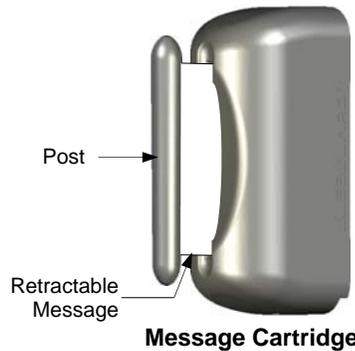

Message Cartridge
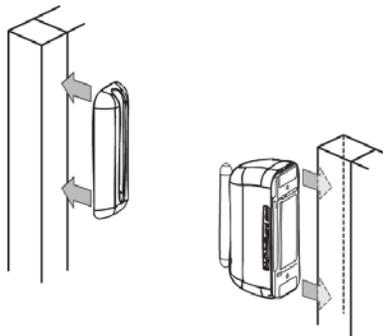

Magnets

Hook & Loop Tape
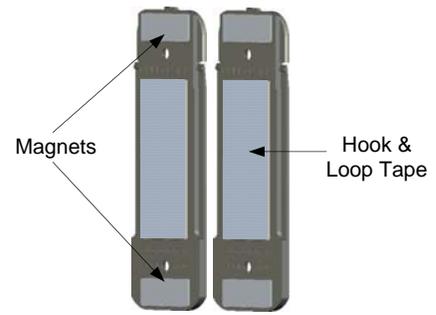

Mount Plates (2 pieces)
May be pre-installed on back of Post Mount and Message Cartridge

---

Installation Instructions

❶ Decide where you want to install your CUBE**GUARD**. (CubeGuard works in entryways up to 50" wide.)

❷ Select the best attachment method for each side of the entryway. They may be different surfaces.

  a) If the surface is flat and magnetic, use magnet installation. **Go To Step 3.**
  b) If the surface has a slight curve or is non-magnetic, then use hook & loop tape installation. **Go To Step 4.**

❸ Using Magnets:

a) Slide Mount Plates into Post Mount and Message Cartridge (if not already pre-installed).

b) Ensure hook side layer of hook & loop tape has been removed from the back of the Mount Plates to maximize magnetic contact.

c) Directly attach Post Mount and Message Cartridge on both sides of your entryway at the desired height.

d) Adjust if necessary to make the banner level.

You are done with your installation!

Note: If the magnets do not hold strongly enough, use hook & loop tape installation instead. (See Step 4)

❹ Using Hook & Loop Tape:

a) Slide the Mount Plates off the Message Cartridge and Post Mount (if pre-installed.)

b) Measure the height at which you want CubeGuard installed. This will ensure both sides are level after installation.

c) Prepare the mounting surfaces by cleaning thoroughly with the provided alcohol swab.

h
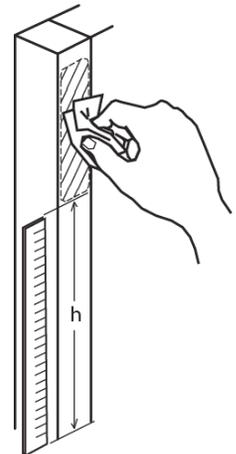

❺
a) Remove backing from loop side piece of hook & loop tape.

b) Position loop side piece and press down firmly to ensure adhesion to mounting surface.

c) Attach Mount Plate with hook & loop tape, making sure it is positioned with the arrows pointing up.
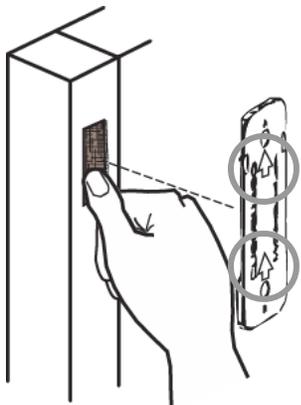

❻
Measure the same height on the opposite side of your entryway and repeat Steps 4 through 5 to attach the second Mount Plate.
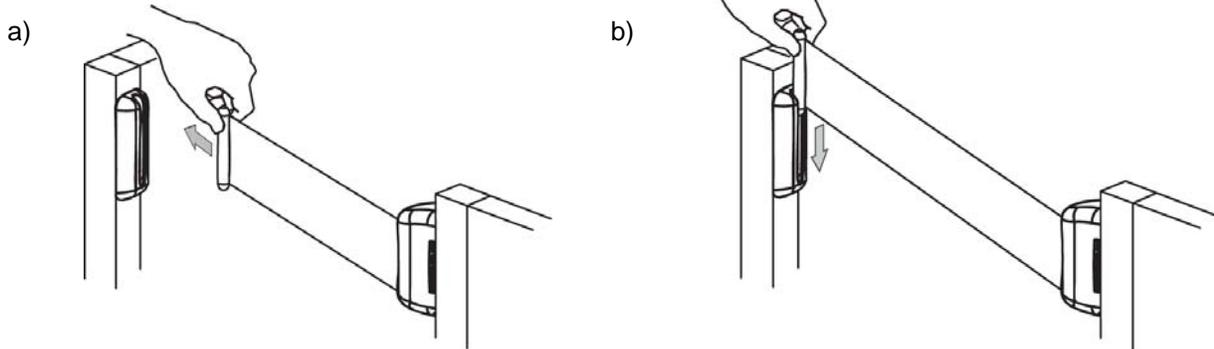

For best results, allow Mount Plate adhesive to cure at least 24 hours before inserting Message Cartridge or Post Mount.

You are done with your installation!
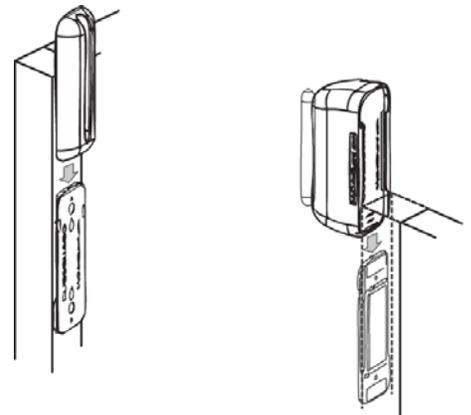

Using Your CUBEGUARD

❶ Extending and Retracting Message Banner

a)

b)

a. To display your CUBE**GUARD** message, grab the Message Post and pull the banner across the cube opening until the post is positioned just above the Post Mount.
b. Slide the post into the Post Mount to secure.
c. To retract your CUBE**GUARD** message banner, grab the banner close to the post and slide it out of the Post Mount.
d. Gently guide the banner back into the cartridge.

⚠ **CAUTION**: To avoid snap-back, do not let go of the Message Post until there are fewer than three inches of banner left to retract.

❷ Changing Message Cartridges

a)

b)

c)
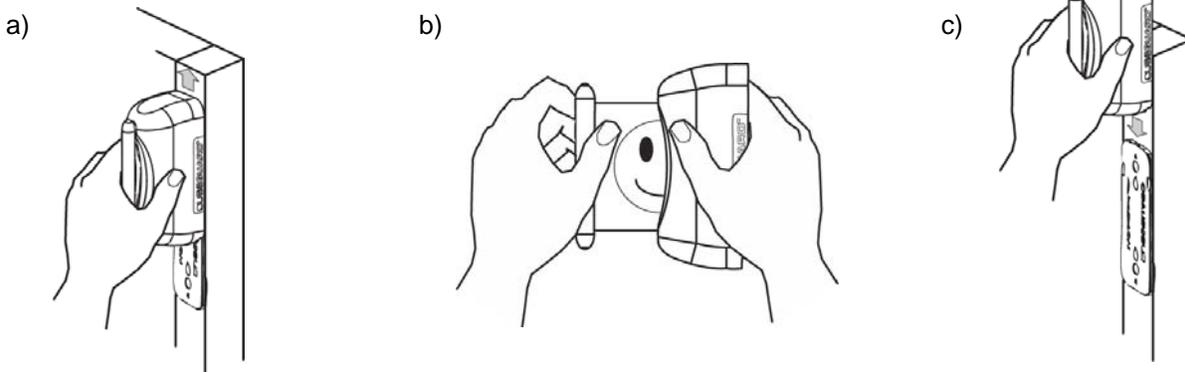

a. Remove the current Message Cartridge by grabbing it by the sides and sliding the cartridge out of the Mount Plate by pulling upwards.
b. Choose the Message Cartridge you want to display.
c. Align the back of the selected cartridge with the Mount Plate, and slide down into place.

Tips & Tricks

• Have different types of surfaces on either side of your cube entry? Mix and match attachment methods by using hook & loop tape on one side and magnets on the other.

• For more permanent installation on walls or doorways, CUBE**GUARD** can be mounted using #6 flat head wood screws (not included) using the holes marked "A" and "B" on the Mount Plates.

• **Buy additional messages or create your own at cubeguard.com!**

WARNING: Do not attempt to disassemble the Message Cartridge beyond the Mount Plate. Message Cartridge contains tightly wound components that may spring out when the housing is opened. Mounts may adhere firmly; use caution when removing.
